1. Labor Item number
2. Work Order number

B. Running the Bar Code Capture application, OEBRCD

1. Available from your main sign-in screen.
 - a. Run on a PC that is accessible to shop employees.
 - b. Have a hand held scanner attached to the PC running the application.
 - c. Have a flat surface available to allow error free scanning of work orders.
 - d. Have available for scanning the common bar codes to allow proper assignment.
2. Reads barcode information and transfers it into the open work order data set.

3. Steps:

- a. Scan **Work Order** bar code.

Scan **Bar Code** on work order to enter work order number

Status Screen shows date/time, invoice, and that it is waiting for the second part of the scan.

Time	Invoice	Keytag	Emp.	Status
04/13/10 14:20:55	WB05829			Awaiting scan

- b. Assign **Key Tag** code to work order

Status Screen shows the key tag assigned

Time	Invoice	Keytag	Emp.	Status
04/13/10 14:28:01	WB05829	1234567		Add keytag.....: OK

- c. Assign **Employee Tag** code to work order

Status Screen shows the **employee** assigned or released

Time	Invoice	Keytag	Emp.	Status
04/13/10 14:23:54	WB05829		JMK	Assign employee.: OK

d Assign **Labor** bar code on work order to **Employee**

- 1) Scan the **Labor** bar code below the item on the work order

Status Screen shows the date, time, invoice, item number and that it is waiting for the employee to be scanned

- 2) Scan the **Employee** bar code

Status Screen shows the employee assigned or released.

Time	Invoice	Keytag	Emp.	Status
04/13/10 14:39:15	WB05829		JMK	Assign lbr: SW10

e. **Release All** employee codes from work order

- 1) Scan **Work Order** bar code on upper right of work order.

- 2) Scan the **Release All** employee barcode.

Status Screen will show the employee released.

Time	Invoice	Keytag	Emp.	Status
04/13/10 14:40:09	WB05829		JMK	Release lbr: SW10
